Change. Although Change has six letters, we often see it as a four letter word. In February we updated our home banking experience and that was change. We hope you understand that changes we make to our technology are not meant to cause you grief, they are meant to keep you safe.

There were 744 data breaches at financial institutions in 2023 as fraudsters target banks and credit unions seeking to access your information. We take this very seriously. In addition to our home banking update, please take the time to update your personal computers and devices. Operating system, software and browser updates contain critical security patches that will keep you safe online.

Enjoy the new online and mobile app experience and stay safe!
